

How to get here:

By Metro: The easiest way to get to this area is by metro, it is just **2 stops from Termini on Line B** (Blue Line) in the direction of Laurentina. The metro stop is called **Colosseo**, and when you exit the station you will immediately see the Colosseum looming above you. The Arch of Constantine is also easy to spot!

By Taxi: Believe it or not, some drivers do not know where the Arch of Constantine is! We have had clients phone us having been dropped off at a different arch in the city. It is best to just take a taxi to the Colosseum, as you will immediately be able to see the Arch of Constantine once you are there.

We meet right here, on the side of the Arch as seen in the photos above. This is the side that is in the shade when it is sunny, hence our choice! If you are in any doubt as to whether you are on the right side, look for the views in the photographs above, and if you are by this column, you are in the right place!
